

INQUIRY RESPONSE DATE: March 4, 2025

SUBJECT: Service Level Review – Snow Clearing

INQUIRY DATE

February 25, 2025

COUNCIL MEMBER

Councillor Netelenbos

INQUIRY

Please provide information on whether the snow and ice service level review being conducted this year will include comparisons with other similar size municipalities (i.e. staff, equipment, schedules, etc.).

RESPONDING DEPARTMENT

Infrastructure

RESPONSE

A review of snow removal and ice control efforts and best practices was completed by the Infrastructure department following the 2021/2022 winter season that explored practices undertaken by other jurisdictions of similar size in the region. Administration's review at that time confirmed that Beaumont's service levels were in alignment.

For 2025, as part of a broader service level review, Administration will again consider and compare staffing, equipment and service level triggers for snow removal and ice control in similar sized jurisdictions in region.
